Eight Reasons to
STOP THE FIBROWATT INCINERATOR!

1. Fibrowatt will provide only a few low-paying jobs to citizens in the Surry-Yadkin-Wilkes area.

2. Higher-paying jobs will likely be filled from outside this area.

3. The Fibrowatt incinerator will pollute the air we breathe and the local food we eat.

4. Fibrowatt will jam our roads with manure and ash-hauling 18 wheelers.

5. Fibrowatt may cause farmers to pay more for fertilizer.

6. Because they are concerned about the health risks associated with incineration, 38 local physicians and 11 local pharmacists have signed a letter of objection to Fibrowatt siting in Surry County.

7. All the profits will go to out-of-state investors; we get the pollutants and the health risks.

8. Property values may decrease by as much as 20 %

Get Involved!
Join C.A.C.H.E. (Citizens' Alliance for a Clean, Healthy Economy). We meet every Monday night at 7 PM at 318 West Main Street, Elkin, North Carolina. Call Eric Harrington (366-7954) or Joan Vasata (336-3334) for more information. Or go to
