Attention Duke Energy Shareholders!

Duke's Energy Resources Are Expanding.

Ask Jim Rogers, which energy resource is:

DIRTIER THAN COAL,

MORE EXPENSIVE THAN WIND,

***AND WOULD COST NORTH CAROLINA'S
FARMERS MILLIONS OF DOLLARS?***

FIBROWATT!

Duke Energy should say "NO!" to energy from poultry litter incineration and support clean renewable energy from safe energy resources. Poultry litter is not clean, not safe, not in the public interest and not in the interest of Duke Energy's shareholders.

Don't buy power from poultry litter incineration!
